

# CJ Series – Life-Cycle Extended for the Future

An evolved, quality-proven best-seller offering future-proof performance achieving full conformance with EU cybersecurity regulations and Chinese GB 40050-2021.

## Coming Autumn 2026

Introducing the Next-Generation CJ3 Series: Fully compatible, preserving all your established CJ2M assets

### CJ Compatibility & Maintenance Benefits

**No changes required** to I/O configurations, programs, parameter settings, or wiring.

**Program conversion is not necessary (use CX-ONE software)**, simplifying maintenance and supporting equipment lifecycle extension and evolution.

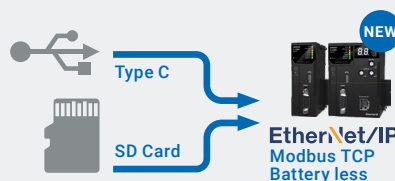

### Enhanced Features of CJ Series

**Improved Ethernet Capabilities:** Strengthened network functionality for better connectivity and performance.

**Built-in SD Card Interface:** Simplifies data handling and storage.

**Battery-Free Design:** Enables maintenance-free operation, reducing long-term service needs.

### Enhanced Security Features

Prevents unauthorized external access  
Safeguards both equipment and data integrity.

Fully aligned with European cybersecurity regulations and Chinese GB 40050-2021 (Critical network devices security common requirements).
