

# eLearning Plus

Online education management

Learning  
content in  
one place

Omron's eLearning platform provides wide variety of Industrial Automation courses from Automation & Safety to Robotics and Vision. With an eLearning Group License (valid 1 year at a time), teacher can use a digital learning environment to support schools curriculum.

- **Structuring a class**

Upload teacher and student information with a simple excel sheet

- **Monitor student progress**

See which courses the students attend, for how long, what results they obtain in the intermediate and final tests; with the relative score

- **Possibility to personalize a training program for a school with a separate Service**

Choose only the correct courses to fit your classes learning outcome. Bespoke environment is created for your school, class or group

Follow learning  
progress with  
standard reports
