

# Welcome to the future of Remote Access

Every second counts on the production line. Omron and Secomea redefine how you connect to your machines to streamline access and minimize delays.

Our industry is adapting to evolving higher standards regarding the accelerated demands for cybersecurity and compliance that emerge from new and upcoming regulations like NIS2 and the Cyber Resilience Act (CRA).

"Defending the Factory Floor" is the cornerstone of Secomea's dedication to the industry. Our relentless focus ensures ongoing enhancements and updates in pursuing this mission. This commitment encompasses continuous updates and improvements to our current solution and a brand-new Secomea Prime platform built on cutting-edge technology and zero-trust architecture.

Alongside access to the new Secomea Prime platform, Secomea is unveiling a range of new packages and innovative features relevant to machine builders and manufacturers, which you can discover at [Secomea.com](https://www.secomea.com).

Omron RT1 SiteManager Gateway works in Secomea Prime Platform to perform remote access and maintenance tasks, from remote programming to troubleshooting. Enabling your service engineers to access and maintain your industrial equipment remotely from any location will help them maximize their time and expertise.

The Secomea Prime platform includes several features, such as:

1. A user-friendly administration dashboard
2. Real-time monitoring of vulnerability scores
3. Compliance with the NIS2 standard for remote access
4. A platform built on the next generation of "zero trust" architecture
5. Frequent and easy product and platform updates

Secomea offers Omron customers who purchase Omron RT1 SiteManager:

- 1) A free first-year subscription to the Secomea Prime Essential Package.
- 2) Omron will be your point of contact including 1<sup>st</sup> level technical support.

## **How do I get started?**

1. Order your first RT1 SiteManager from Omron
2. Fill in the form on the Omron Webpage ([Remote Access Solution | OMRON, Europe](#)) to request Omron pre-registration for the Secomea Prime Essential Subscription package.
3. Secomea will contact you directly to confirm the subscription agreement.

If you have questions, please do not hesitate to contact your local Omron contact or Secomea at [connect@secomea.com](mailto:connect@secomea.com).

Thank you in advance. We look forward to continuing our collaboration to meet the increasing customer and regulatory demands in cybersecurity and compliance.

Yours sincerely,

**Secomea A/S**
